DEPARTMENT

Radiation Oncology

CLINICAL FOCUS

Dr. Atalar's clinical work centers on modern radiotherapy techniques and their use in a range of cancers. Her listed procedures include intraoperative radiotherapy, brachytherapy, robotic radiosurgery, stereotactic radiosurgery, stereotactic body radiotherapy for lung cancer, volumetric modulated arc therapy and 3D conformal arc...

Her published work reflects these areas. She has co-authored papers on intraoperative radiotherapy in recurrent rectal cancer, brachytherapy for inoperable cervical cancer, robotic radiosurgery of head and neck paragangliomas, and radiosurgery combined with erlotinib in non-small cell lung cancer with multiple brain metastases.

Recurrent rectal cancer

Inoperable cervical cancer

Head and neck paragangliomas

Non-small cell lung cancer

Brain metastases

CONDITIONS TREATED

Brain tumor

Head and neck paragangliomas

Brain metastases

Glioblastoma multiforme with spinal metastasis
