CLINICAL FOCUS

The main focus of Dr. Khishigsuren's practice is breast cancer. As a medical oncologist, she is involved in the evaluation of patients with a breast cancer diagnosis and in the medical management of the disease. This work typically begins with a careful review of the patient's history, existing imaging, laboratory and pathology results and any treatment that has already been given, so that the current stage of the disease and...

Her background in Internal Medicine, completed before her Medical Oncology training, is relevant to the care of patients whose cancer treatment must be considered alongside other medical conditions. Dr. Khishigsuren discusses the available medical treatment options with each patient in a clear and measured way, taking into account the diagnostic findings and the patient's own priorities.

Breast cancer

INTERNATIONAL PATIENTS

Dr. Khishigsuren consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments...
