DEPARTMENT
Dental & Oral Health

CLINICAL FOCUS

The core of Dr. Kesim's practice is orthodontics. She assesses dental alignment in patients of different ages, examining how the teeth are positioned within each jaw and how the upper and lower teeth relate to each other. This assessment forms the basis of an individual treatment plan, which is discussed with the patient before any treatment begins.

Dr. Kesim also addresses broader oral and dental health as part of the orthodontic process. A stable and healthy oral environment is a general prerequisite for orthodontic treatment, so the condition of the teeth and surrounding tissues is reviewed during assessment.

INTERNATIONAL PATIENTS

Dr. Kesim consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, including dental X-rays and any earlier orthodontic records or treatment summaries, and arranges appointments and the hospital visit itself.
