CLINICAL FOCUS

A substantial part of Dr. Kurtaran's practice involves lower respiratory tract infections, including bronchitis and pneumonia. Evaluation in these cases generally includes a review of symptoms, existing imaging, and laboratory results in order to identify the likely cause and decide on an appropriate course of treatment.

Dr. Kurtaran has particular experience with chronic and sexually transmitted infections. She evaluates and manages hepatitis, HIV and AIDS, syphilis, and HPV, including long-term follow-up where this is needed. Preventive care is another element of her work: she provides adult vaccination guidance and travel health advice for patients preparing for international travel.

Lower respiratory tract infections

Bronchitis

Pneumonia

Communicable diseases

Sexually transmitted infections

INTERNATIONAL PATIENTS

Dr. Kurtaran speaks Turkish and English, and interpreters can be arranged for patients who need support in other languages. Before a visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as laboratory and pathology results, chest X-ray or CT reports, previous treatment records, and discharge summaries, and arranges appointments...
