Neurosurgery

CLINICAL FOCUS

Dr. Kaya's clinical work is dedicated to spine surgery and spine health. He evaluates and treats lumbar disc herniation and cervical disc herniation, cervical spinal stenosis and reduced lumbar lordosis. For patients in whom the spine needs to be stabilized, he performs spinal fusion surgery.

His areas of expertise also include spinal and spinal cord tumors, tethered cord syndrome and transverse myelitis. These conditions affect the spinal cord itself or the structures around it, and each requires a careful diagnostic work-up before any treatment plan is proposed. Dr.
