CLINICAL FOCUS

The core of Dr. Karaca's practice is breast imaging. She evaluates patients with breast diseases using mammography, a radiographic examination of the breast that is used to detect and characterize changes in breast tissue. Mammographic findings are interpreted in the context of the patient's history and any earlier imaging, and Dr.

Dr. Karaca also performs and interprets ultrasound imaging. In breast assessment, ultrasound is often used alongside mammography to examine areas of concern in more detail, to distinguish between different types of tissue changes and to evaluate findings that may be less clearly visible on a mammogram. Ultrasound imaging is also applied to other clinical questions where a radiologist's assessment is requested.

INTERNATIONAL PATIENTS

Dr. Karaca consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as earlier mammography or ultrasound reports, MRI or CT reports, laboratory and pathology results and discharge summaries, and arranges appointments and...
