CLINICAL FOCUS

Dr. Erten's clinical work centers on the care of patients who require anesthesia and on the management of critically ill patients in the intensive care setting. Intensive care treatment involves close monitoring of vital functions and the support of organ systems in patients whose condition is unstable or who are recovering from major surgery or serious illness.

Palliative care is a further area of Dr. Erten's expertise. This aspect of care focuses on relieving symptoms such as pain and breathlessness and on supporting comfort and quality of life for patients with serious or advanced illness. Palliative approaches may be considered alongside other treatments or when the goals of care shift toward comfort.

INTERNATIONAL PATIENTS

Dr. Erten consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior medical documentation, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
