DEPARTMENT
Dental & Oral Health

CLINICAL FOCUS

Dr. Atıcı provides dental care for patients within the Oral and Dental Health unit, covering the assessment of oral health, the discussion of treatment options and the delivery of dental treatment. A consultation begins with an evaluation of the teeth, gums and existing dental work so that the patient's situation can be understood before any treatment is considered.

Treatments described on this site within this area of dentistry include E-Max crowns, composite bonding, laminate veneers and full mouth reconstruction. Whether a particular treatment is appropriate depends on the individual patient's dental condition, and this is determined only after a clinical examination and a review of any existing records.

INTERNATIONAL PATIENTS

Dr. Atıcı consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, CT reports, laboratory results and notes from previous treatments, and arranges appointments and the hospital visit.
