Dental & Oral Health

CLINICAL FOCUS

A substantial part of Dr. Ölce's work concerns the treatment and restoration of damaged or decayed teeth. This includes root canal treatment for teeth with inflamed or infected pulp, dental fillings for cavities and minor defects, and extractions where a tooth cannot be preserved.

Dr. Ölce also works in aesthetic dentistry. Her procedures in this area include laminate veneers, composite bonding for reshaping or repairing the visible surfaces of teeth, and teeth whitening. Gum health forms a further focus of her practice.

Zirconia restorations

INTERNATIONAL PATIENTS

Dr. Ölce consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, panoramic images and records of previous treatments, arranges appointments and organises...
