Acibadem Atasehir Hospital, İstanbul

DEPARTMENT
Ophthalmology

CLINICAL FOCUS

A large part of Dr. Özkan's practice concerns conditions that affect vision at different stages of life. She evaluates and treats cataract, and she sees patients with refractive errors, including myopia and hyperopia. She also cares for children with pediatric eye diseases, an area that requires age-appropriate examination and follow-up.

Dr. Özkan additionally manages disorders of the eyelids and the ocular surface, such as blepharitis (inflammation of the eyelid margins), drooping eyelids and eyelid twitching. Patients experiencing visual disturbances related to ocular migraine are assessed to distinguish this condition from other causes of temporary visual symptoms.

Blepharitis Pediatric eye diseases Drooping eyelids
Ocular stem cell treatment Ocular migraine

CONDITIONS TREATED

Blepharitis Cataracts Cataract Eye trauma
Retinal detachment
