CLINICAL FOCUS

Dr. Kasapoğlu's areas of expertise are oral implantology and esthetic dentistry. In implantology, her work concerns the assessment and planning of treatment for patients with missing teeth, including whether an implant-based approach is suitable in a given case.

Her second area of focus is esthetic dentistry, which addresses concerns about the appearance of the teeth and smile. Here, too, the approach is individualized: Dr. Kasapoğlu reviews the patient's expectations alongside the clinical findings and explains which options may be appropriate and what each involves.

Oral implantology

Esthetic dentistry

INTERNATIONAL PATIENTS

Dr. Kasapoğlu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as X-ray or CT reports, laboratory results and notes from earlier treatments, and arranges appointments and the hospital visit itself.
