CLINICAL FOCUS

A central part of Dr. Arık's work is breast imaging. He performs and interprets mammography and is involved in the radiological assessment of breast conditions, which may include correlating findings across different imaging methods and reporting them to the referring physician.

Within interventional radiology, Dr. Arık uses imaging to guide minimally invasive procedures. The suitability of any image-guided procedure depends on the individual patient's findings, general health, and the results of prior investigations, and it is decided together with the treating team after the available imaging has been reviewed.

INTERNATIONAL PATIENTS

Dr. Arık consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes, and discharge summaries, and arranges appointments and the...
