Outpatient Clinic, İstanbul

DEPARTMENT
Pediatrics

CLINICAL FOCUS

Dr. Kayiran's clinical work centers on general pediatric care across childhood. This includes newborn follow-up, newborn screening tests, and well-child follow-up, in which growth, development, and general health are monitored at regular intervals. She also follows children with nutritional disorders and assesses feeding-related concerns, including infant lactose intolerance.

In addition, she diagnoses and treats childhood infectious diseases and upper respiratory tract illnesses in children, and she manages common functional problems such as childhood constipation and childhood urinary incontinence.

Infant lactose intolerance

Childhood constipation

Child and adolescent health

Childhood urinary incontinence

Upper respiratory tract illnesses in children

INTERNATIONAL PATIENTS

Dr. Kayiran consults in Turkish and English, and interpreters can be arranged for families who speak other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging — for example ultrasound or X-ray reports, laboratory results, growth records, vaccination records, and discharge summaries —...
