DEPARTMENT
Anesthesiology & Reanimation

CLINICAL FOCUS

Dr. Çataloğlu's areas of expertise are anesthesiology, reanimation and perioperative anesthesia care. As an anesthesiologist, her role is centered on the patient's safety and comfort around a surgical procedure. This begins before surgery, when the patient's medical history, current medications and existing test results are reviewed so that the anesthesia plan can be adapted to the individual.

Reanimation refers to the care of patients whose vital functions need close monitoring and support, and it forms part of the same unit in which Dr. Çataloğlu practises. For international patients, this means that anesthesia care is coordinated with the surgical team around the planned procedure and the patient's individual clinical needs.

Anesthesiology Reanimation Perioperative anesthesia care

INTERNATIONAL PATIENTS

Dr. Çataloğlu speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. The international patient team coordinates the collection of prior reports and imaging, including MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
