General Surgery

CLINICAL FOCUS

A substantial part of Dr. Esen's work concerns the colon, rectum and anal region. He assesses and treats hemorrhoids, anal fissure and other anorectal diseases, and he carries out colorectal surgery and gastroenterological and coloproctology surgery. Patients with inflammatory bowel disease may be seen for surgical evaluation when their condition or its complications call for a surgical opinion.

Dr. Esen also performs endocrine surgery, including thyroid surgery for patients with thyroid disorders, and he repairs inguinal and umbilical hernias. In addition, he assesses and manages pancreatic, liver and biliary tract diseases, and international patients can consult him for evaluation and surgical planning in gastrointestinal cancers.

Anal fissure Anorectal diseases Inflammatory bowel disease
Endocrine surgery Endoscopy

INTERNATIONAL PATIENTS

Dr. Esen consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
