CLINICAL FOCUS

The work of the Emergency Service centers on the prompt clinical evaluation of patients who present with acute complaints. Dr. Kahveciler's role is to assess these patients, take a focused history, perform a clinical examination and decide on the next steps in their care.

For international patients, this means that a visit to the Emergency Service is structured around the immediate clinical picture rather than a pre-planned program. Patients are seen in order of clinical priority, and the assessment is adapted to the symptoms and findings at the time of presentation.

INTERNATIONAL PATIENTS

Dr. Kahveciler consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
