CLINICAL FOCUS

Dr. Peynircioğlu's clinical work centers on interventional radiology and interventional oncology, which use image guidance to perform treatments through the blood vessels or through the skin.

His published work reflects these interests. He has co-authored studies on transarterial radioembolization with Y90 resin microspheres, on survival factors after radioembolization in patients with unresectable intrahepatic cholangiocarcinoma, and on the laboratory toxicity of selective intra-arterial radionuclide therapy for primary and...
