DEPARTMENT
Nephrology Department

CLINICAL FOCUS

Dr. Ruhi evaluates and manages a range of acute and chronic kidney conditions. Patients with kidney disease are assessed to establish the underlying cause and the stage of the condition, and a treatment and follow-up plan is discussed on the basis of the individual findings.

For patients whose kidney function is no longer sufficient, Dr. Ruhi provides hemodialysis care, including planning, monitoring and ongoing medical follow-up. He also works on the nephrology side of kidney transplantation, supporting patients with medical evaluation before transplant and nephrology follow-up afterwards.

Kidney Diseases Kidney Failure Diabetic Nephropathy
Hemodialysis Nephrotic Syndrome

INTERNATIONAL PATIENTS

Dr. Ruhi consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as laboratory and pathology results, ultrasound, CT or MRI reports, operative notes and discharge summaries, and arranges appointments and the hospital...
