CLINICAL FOCUS

Dr. Ayoğlu's clinical work concentrates on conditions that affect the lens, the cornea and the optic nerve. She evaluates patients with cataract, in which the natural lens of the eye becomes cloudy, and advises on whether and when surgery may be appropriate. Her interests include smart lens procedures, in which the natural lens is replaced with an intraocular lens.

Dr. Ayoğlu also manages glaucoma, a condition in which pressure inside the eye can damage the optic nerve and where regular monitoring is important. She sees patients with refractive errors such as myopia and astigmatism, discussing correction options in light of each patient's examination findings.

Keratoconus

INTERNATIONAL PATIENTS

Dr. Ayoğlu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, for example previous eye examination records, laboratory results, operative notes and discharge summaries, and arranges appointments and the hospital visit itself.
