CLINICAL FOCUS

A large part of Dr. Özşeker's practice involves ultrasound imaging, which is used to examine soft tissues and organs without ionizing radiation. Doppler ultrasound, a related technique that assesses blood flow in vessels, is another area of his expertise.

Dr. Özşeker also has a particular interest in breast diseases. His work in this area includes mammography and breast ultrasound, which are used in the evaluation of breast symptoms and in the characterization of findings that require further assessment.

INTERNATIONAL PATIENTS

Dr. Özşeker speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge...
