Ophthalmology

CLINICAL FOCUS

A large part of Dr. Tuncel's practice concerns conditions that affect vision over time. He evaluates and treats cataracts, in which the natural lens of the eye becomes cloudy, and myopia, or short-sightedness.

Dr. Tuncel also sees patients with conditions of the eye surface and eyelids, including eye allergies, blepharitis (inflammation of the eyelid margins) and eyelid myokymia, the involuntary twitching of the eyelid.
