Radiation Oncology

CLINICAL FOCUS

Dr. Kaplan's clinical practice covers radiation oncology across a range of cancer diagnoses. His stated areas of expertise include radiotherapy for brain tumors and breast cancer, as well as brachytherapy, in which a radiation source is placed close to or inside the area being treated.

His published research reflects a broad interest in radiation oncology. Co-authored papers have examined concurrent chemoradiotherapy in locally advanced non-small cell lung cancer, prognostic factors in elderly lung cancer patients, the effect of radiotherapy dose rates on early intestinal toxicity, nutritional status and psychiatric...
