CLINICAL FOCUS

Dr. Çıtamak evaluates and treats a range of urinary tract conditions. These include kidney diseases and kidney stones, bladder health and bladder diseases, and urinary incontinence. He is also involved in the diagnosis and treatment of prostate diseases and in the treatment of urethral diseases.

A further part of his practice is andrology and male reproductive health. This covers the assessment and treatment of sexual dysfunction and the evaluation of male infertility. The choice of investigation and treatment depends on the individual patient's history, examination findings and test results, and is discussed with the patient...
