CLINICAL FOCUS

A substantial part of Dr. Güler's practice concerns the pelvic floor and the lower urinary tract. He assesses and manages urinary incontinence and other bladder health concerns within the framework of urogynecology, where symptoms are evaluated together with a woman's gynecological and obstetric history.

In surgery, Dr. Güler has training in vNOTES scarless surgery, an approach that uses vaginal laparoscopy so that access is gained without abdominal incisions; whether this approach is appropriate depends on the individual case. He also has training in genital aesthetics, including labioplasty, vaginoplasty, clitoroplasty, and vaginal whitening.

INTERNATIONAL PATIENTS

Dr. Güler consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments, and organizes the hospital stay.
