CLINICAL FOCUS

Dr. Tander's clinical work covers a range of common and complex conditions in pediatric surgery. In the genital and inguinal region, he treats undescended testicle, hydrocele, spermatic cord cyst, pediatric hernia and pediatric umbilical hernia, and he performs circumcision.

Within his subspecialty of pediatric digestive system surgery, his practice includes pediatric appendicitis and Hirschsprung disease. The choice of approach for each child depends on the diagnosis, the child's age and general condition, and the findings of the clinical assessment.
