CLINICAL FOCUS

In gynecology, Dr. Tanır evaluates and manages menstrual irregularities and menstrual pain, polycystic ovary syndrome and menopause. He also sees patients with infertility, where assessment usually begins with a review of the couple's history, previous test results and any earlier treatment before further steps are discussed.

In obstetrics, his practice includes the diagnosis and management of ectopic pregnancy, gestational diabetes and preeclampsia, as well as delivery care. He performs cesarean deliveries and supports epidural delivery for patients who choose this option.

Menstrual irregularities Menstrual pain Ectopic pregnancy
Epidural delivery Preeclampsia

CONDITIONS TREATED

Menstrual irregularities Menstrual pain Ectopic pregnancy
Preeclampsia Gestational diabetes
