İstanbul

DEPARTMENT
Ophthalmology

CLINICAL FOCUS

A substantial part of Dr. Tanyıldız's practice is devoted to the cornea. He evaluates and treats patients with keratoconus and other corneal conditions, and performs corneal transplantation, drawing on his experience as medical director of a cornea bank.

Beyond the cornea and lens, his areas of expertise include uveitis, an inflammatory condition of the eye that often requires long-term follow-up; amblyopia; eye cancer; and ocular stem cell treatment.

Myopia Amblyopia Ocular stem cell treatment Eye cancer

Smart lenses
