DEPARTMENT
Internal Medicine

CLINICAL FOCUS

A central part of Dr. Efelerli's practice is the assessment and treatment of thyroid diseases. This work typically involves reviewing a patient's symptoms and history, evaluating existing laboratory results and imaging, and discussing appropriate treatment options based on the individual situation.

Dr. Efelerli also works with patients affected by obesity and prediabetes. In these areas, the emphasis is on identifying metabolic risk factors early, understanding how they interact with other health conditions, and agreeing on a realistic, medically supervised plan. Chronic disease management forms a further part of her practice;

Thyroid Diseases and Treatment

Obesity

Chronic Disease Management

Prediabetes

Thyroid diseases and treatment

INTERNATIONAL PATIENTS

Dr. Efelerli consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior medical reports, laboratory results and imaging, arranges appointments and organizes the hospital visit.
