DEPARTMENT

Pediatric Nephrology

CLINICAL FOCUS

A large part of Dr. Akbulut's practice concerns pediatric urinary tract infections and the conditions that may underlie or follow them. These include vesicoureteral reflux, renal scarring, urinary tract infections associated with horseshoe kidney, and congenital anomalies of the kidney and urinary tract.

Dr. Akbulut's areas of expertise further include pediatric hypertension, including hypertension after renal transplantation, and childhood minimal change nephrotic syndrome. For children with advanced kidney disease, she provides pediatric dialysis care and pediatric kidney transplant care, including the follow-up of complications such...
