Acibadem Atasehir Hospital, İstanbul

DEPARTMENT
Pediatrics

CLINICAL FOCUS

A large part of Dr. Solmaz's practice involves infants and young children. She assesses babies with lactose intolerance, infant colic and gas pain, and she evaluates childhood constipation, a frequent reason for pediatric visits.

Dr. Solmaz evaluates children with hematuria (blood in the urine) and urinary incontinence, conditions that may have several possible causes and are approached step by step. She manages upper respiratory tract illnesses in children and assesses children with suspected or confirmed measles.

Lactose intolerance in infants

Childhood constipation

Iron deficiency and anemia in children

Hematuria in children

Infant colic

INTERNATIONAL PATIENTS

Dr. Solmaz consults in Turkish and English, and interpreters can be arranged for families who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports, such as laboratory results, imaging reports, previous prescriptions and discharge summaries, and arranges the appointment...
