HOSPITAL

Acibadem Altunizade
Hospital, İstanbul

DEPARTMENT

Dental & Oral Health

CLINICAL FOCUS

Dr. Sevinç's areas of expertise center on endodontics and the conservation of natural tooth structure. She provides root canal treatment for teeth affected by tooth root infections or damage to the pulp, with the aim of retaining the tooth where this is clinically appropriate.

Her restorative work includes dental fillings for cavities and minor defects, as well as the management of broken teeth and enamel loss. For teeth that have lost a larger portion of their structure, she uses porcelain inlays and onlays, which are indirect restorations made to fit the prepared tooth. Dr.

INTERNATIONAL PATIENTS

Dr. Sevinç consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, CT scans and records of previous treatments, arranges appointments and organizes the hospital visit.
