DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

Within the Gynecology & Obstetrics unit, Dr. Erol provides care for women's reproductive health and for obstetric needs. The unit's scope includes the evaluation and management of benign gynecological conditions such as endometriosis, ovarian cysts, polycystic ovary syndrome, vaginal infections and genital warts.

The unit also addresses cosmetic gynecology and aesthetic genital surgery, including labiaplasty, vaginal rejuvenation and laser vaginal rejuvenation. Whether a particular procedure is appropriate depends on the individual patient's history, examination findings and personal goals, and these are discussed during consultation before any decision is made.

INTERNATIONAL PATIENTS

Dr. Erol speaks Turkish and English, and interpreters can be arranged for patients who prefer another language. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example ultrasound, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...

CONDITIONS TREATED

Adenomyosis
