DEPARTMENT
Dental & Oral Health

CLINICAL FOCUS

Dr. Ayduk's main area of practice is orthodontics. This includes the evaluation of tooth position, dental alignment and the way the upper and lower teeth meet, as well as the identification of bite-related concerns that may benefit from orthodontic treatment. Each patient is assessed individually, since the suitability of a given orthodontic approach depends on the person's dental development, oral health and treatment goals.

Her work also covers broader oral and dental health, dental assessment and treatment planning. After an initial assessment, she prepares a treatment plan tailored to the individual patient's needs and explains the proposed steps, the expected duration and the alternatives where relevant.

INTERNATIONAL PATIENTS

Dr. Ayduk consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, panoramic images, CT reports, laboratory results and notes from previous dental or orthodontic treatment, and arranges appointments and...
