DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

Dr. Yazıcıoğlu's clinical work centers on reproductive medicine and in vitro fertilization. He evaluates and treats women with fertility-related concerns, including low ovarian reserve, and carries out AMH assessment as part of the evaluation of ovarian reserve. Egg freezing is among the fertility-preservation options he offers.

Beyond fertility care, his gynecological practice includes hysterectomy, genital aesthetics, and the treatment of genital warts. The suitability of any procedure is determined after clinical examination and a review of the patient's history and prior results, and options are discussed with the patient before a plan is agreed.

Genital aesthetics Hysterectomy Polycystic ovary syndrome
Egg freezing Low ovarian reserve

CONDITIONS TREATED

Polycystic ovary syndrome Egg freezing Low ovarian reserve
Low ovarian reserve (AMH) Genital warts
