CLINICAL FOCUS

A significant part of Dr. Aksoğan's practice involves chronic inflammatory skin diseases. He evaluates and treats patients with psoriasis and atopic dermatitis, as well as Behçet's disease, a condition that may involve the skin and mucous membranes among other systems.

Dr. Aksoğan additionally addresses hair loss and excessive sweating (hyperhidrosis). His procedural work includes cryotherapy, which is commonly used for warts and certain other skin lesions, and botulinum toxin applications, which may be considered in the management of excessive sweating. His clinical interests also extend to PRP and hair mesotherapy in the context of hair loss treatment.

INTERNATIONAL PATIENTS

Dr. Aksoğan consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports, such as previous dermatology notes, laboratory and pathology results, photographs of the affected area if available, and any discharge summaries, and arranges...
