CLINICAL FOCUS

Dr. Çalışkan's practice centers on interventional radiology and interventional neuroradiology, in which imaging is used to guide minimally invasive procedures. Within gastrointestinal oncology, his areas of expertise include transarterial radioembolization (TARE), a catheter-based procedure that delivers treatment through the arterial...

Diagnostic imaging is an integral part of his work. He has particular experience with ultrasound imaging and computed tomography, both of which are used to characterize findings, to plan image-guided procedures, and to follow patients after treatment.
