Hospital, İstanbul

DEPARTMENT
Gastroenterology

CLINICAL FOCUS

A central part of Dr. Gönen's work is the care of patients with inflammatory bowel disease, including Crohn's disease and ulcerative colitis. He also evaluates and manages celiac disease, other small bowel diseases, reflux, and gastritis.

Dr. Gönen performs diagnostic and therapeutic endoscopy, including gastroscopy, esophagoscopy, colonoscopy, and ERCP. These procedures are used to examine the esophagus, stomach, small bowel, colon, and bile ducts, to take tissue samples where needed, and, in selected cases, to treat findings during the same procedure.
