Dental & Oral Health

CLINICAL FOCUS

A significant part of Dr. Sart's work concerns the health of the gums and the tissues that support the teeth. He sees patients with gingivitis and gum disease, and he assesses bad breath, which may be related to conditions in the mouth. His general dental practice includes dental fillings for decayed or damaged teeth and tooth extraction when a tooth cannot be preserved.

In aesthetic dentistry, Dr. Sart provides porcelain restorations, laminate veneers, zirconia restorations and composite bonding. These treatments are used to change the shape, color or surface of teeth, or to restore teeth that have been worn or chipped.

INTERNATIONAL PATIENTS

Dr. Sart consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays and records of previous treatments, and arranges appointments and the hospital visit.
