CLINICAL FOCUS

Dr. Ayabakan evaluates and manages congenital heart disease in children, including atrial septal defect (ASD), as well as cardiomyopathy, heart valve disorders and heart failure. Her diagnostic work includes echocardiography, and in particular fetal echocardiography for the prenatal diagnosis of heart conditions, which allows a suspected...

She also performs cardiac catheterization and treats arrhythmias in children, including catheter ablation for arrhythmias. The choice between observation, medication, catheter-based treatment or referral for surgery depends on the individual child's diagnosis, age and clinical findings, and is discussed with the family after a full...
