Acibadem Etiler Outpatient  
Clinic, İstanbul

DEPARTMENT  
Internal Medicine

### CLINICAL FOCUS

Dr. Çelebi's practice is dedicated to adult internal medicine. Internal medicine addresses the general medical care of adults, including the initial evaluation of new symptoms, the assessment of patients whose complaints may involve more than one organ system, and the ongoing management of established medical conditions.

A consultation with Dr. Çelebi typically begins with a careful review of the patient's medical history and current symptoms, followed by a clinical examination and consideration of any existing laboratory results, imaging or previous treatment records. On this basis, she discusses with the patient which further investigations, if any, may be appropriate and what the possible next steps could be.

### INTERNATIONAL PATIENTS

Dr. Çelebi consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organises the hospital visit.
