Acibadem Bodrum Hospital, Muğla

DEPARTMENT
Internal Medicine

CLINICAL FOCUS

A large part of Dr. Çam's practice concerns metabolic and endocrine conditions. He evaluates and manages type 1 diabetes, type 2 diabetes and prediabetes, as well as thyroid disorders, which form his subspecialty area. He also sees patients with obesity and provides guidance on clinical nutrition, where dietary measures are considered as part of an overall management plan.

His work also covers digestive and age-related concerns. Dr. Çam treats gastroenteritis, gastritis, fatty liver disease and chronic pancreatitis, and he supports patients with long-term conditions through chronic disease management, including regular follow-up and coordination of monitoring where appropriate.

INTERNATIONAL PATIENTS

Dr. Çam consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organises the hospital visit.
