Emergency Service

CLINICAL FOCUS

Dr. Özbey's areas of expertise reflect the core presentations seen in an emergency department. These include acute chest pain evaluation, in which cardiac and non-cardiac causes are considered and appropriate testing is initiated; acute abdominal pain evaluation; and respiratory distress management for patients with breathing difficulty.

Trauma and injury care form another part of the clinical work. Dr. Özbey carries out trauma initial assessment, wound care and suturing, and fracture and dislocation management. Emergency ultrasound assessment is used at the bedside to support diagnosis in trauma, abdominal and cardiac presentations. Emergency care is by nature time-limited;

Acute chest pain evaluation

Trauma initial assessment

Wound care and suturing

Fracture and dislocation management

Acute abdominal pain evaluation

INTERNATIONAL PATIENTS

For patients coming from abroad, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit. A first consultation with Dr.
