CLINICAL FOCUS

Dr. Arar's practice is centered on pediatric dentistry. Children have dental needs that differ from those of adults: their teeth and jaws are still developing, primary teeth are gradually replaced by permanent teeth, and habits formed early can influence oral health for many years.

Children's oral health is the second main theme of her practice. This involves assessing the condition of the teeth and surrounding tissues, identifying problems that may need attention and discussing with parents how the child's oral health can be supported over time. Dr.

INTERNATIONAL PATIENTS

Dr. Arar consults in Turkish and English, and interpreters can be arranged for families who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example X-ray reports and records of previous dental treatments, and arranges the appointment and the hospital visit.
