CLINICAL FOCUS

Dr. Türker's areas of expertise include anaphylaxis and environmental emergencies. Anaphylaxis is a severe, rapidly developing allergic reaction that can affect breathing, circulation and the skin, and it requires immediate recognition and treatment.

Environmental emergencies are conditions that arise from exposure to the surrounding environment rather than from an underlying disease alone. They may include the effects of excessive heat or cold, illness related to water or altitude, and injuries from animal or insect contact.

Environmental emergencies

INTERNATIONAL PATIENTS

Dr. Türker consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, arranges appointments and organizes the hospital visit.
