CLINICAL FOCUS

Dr. Aygün evaluates and manages a broad range of liver diseases, including fatty liver disease and hepatitis, together with pancreatic diseases and biliary tract diseases. In the field of inflammatory bowel disease, he sees patients with Crohn's disease and ulcerative colitis, conditions that usually require long-term follow-up and an...

His endoscopic practice includes gastroscopy, which is used in the assessment of upper digestive complaints and of conditions such as Barrett's oesophagus, and ERCP, an endoscopic procedure applied in the diagnosis and treatment of selected bile duct and pancreatic conditions.
