DEPARTMENT

Orthopedics & Joint Center

CLINICAL FOCUS

Dr. Tangay's clinical work covers sports injuries and knee injuries, including meniscus tears and cruciate ligament ruptures. He assesses and treats conditions of the shoulder and elbow, and his practice includes elbow surgery.

He also treats conditions of the foot and ankle through foot and ankle surgery and evaluates bone cysts in children. As with any orthopedic condition, the choice between conservative treatment and surgery depends on the findings of the clinical examination, the imaging results, and the patient's individual circumstances, which are...
