DEPARTMENT
Emergency Service

CLINICAL FOCUS

Dr. Sakal's clinical work centers on emergency assessment of patients presenting with acute medical conditions. His areas of expertise include rapid diagnosis, immediate treatment and urgent care. In the emergency setting, his role is to evaluate the patient's condition, identify the likely cause of acute symptoms as quickly as the clinical picture allows, and begin treatment where it is needed without delay.

Emergency care typically involves a structured initial assessment, a focused history and examination, and the use of diagnostic tests as indicated by the patient's presentation. Following this initial phase, Dr. Sakal determines the appropriate next steps, which may include continued treatment within the Emergency Service, referral to another specialty for further care, or discharge with guidance.
