CLINICAL FOCUS

A significant part of Dr. Alçay's practice is devoted to sexual dysfunction treatment, including the assessment of painful intercourse (dyspareunia), and to menopause care, where she evaluates symptoms and discusses management options with each patient.

On the obstetric side, Dr. Alçay offers epidural childbirth and follows patients after delivery, including the evaluation of postpartum fever. Her surgical work includes hysterectomy, which is discussed with patients when it is considered clinically appropriate after a review of the individual situation.
