CLINICAL FOCUS

A significant part of Dr. Elbistan's work concerns diabetes and endocrine conditions. She treats patients with type 1 diabetes and type 2 diabetes, including diagnosis, planning of treatment, and long-term follow-up. She also manages thyroid disease and pituitary disease, which are among her subspecialty areas, and provides diagnosis and treatment of metabolic diseases and obesity.

Dr. Elbistan also sees patients with digestive system disorders, including reflux, gastritis, dyspepsia and gastroenteritis, as well as diseases of the liver, pancreas and biliary tract, among them chronic pancreatitis. Her practice includes the assessment and treatment of anemia, which may be identified during the work-up of another complaint or may be the primary reason for the consultation.

INTERNATIONAL PATIENTS

Dr. Elbistan consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organizes the hospital visit.
