CLINICAL FOCUS

Dr. Ersemiz works within Family Medicine and Functional Medicine, with an emphasis on the overall health of the individual rather than a single organ system. His areas of expertise include chronic disease care and health management, in which existing conditions are followed over time and treatment plans are reviewed as circumstances...

A further part of his practice concerns healthy aging, anti-aging care, wellness and healthy living. This includes longevity applications, which are approached from a preventive and functional medicine perspective and adapted to each patient's history, examination findings and personal circumstances.
